

Your entire social media team, inside **one WhatsApp chat.**

ONVOIX writes, schedules and publishes across Instagram, TikTok, LinkedIn, Facebook and Reddit — with audience discovery, trend tracking and weekly growth proof. Approved by you in one reply.

24,000+ influencers & brands

4.8/5 · 26,000+ reviews

5 platforms connected

Pre-seed · raising \$750K

Social media is a second full-time job creators and local businesses never signed up for.

They came to make content and grow an audience — instead they drown in captions, scheduling apps, hashtag research and analytics dashboards.

15+ hrs

burned every week

Writing, formatting, cross-posting and re-sizing the same content for five different platforms. Most of it is manual repetition.

1 post

...then silence

Algorithms reward consistency. Reality: creators post in bursts, then disappear for weeks when the day job takes over — and reach collapses.

5 tools

to do one job

Scheduler here, hashtag tool there, analytics in a third, trends somewhere else. Dashboards built for marketing teams, not for one busy person.

The pattern: the work isn't creative, it's logistics — and logistics is exactly what software should absorb.

Who feels it most: solo creators, restaurants, clinics, studios, boutique brands — teams of one.

Existing tools moved the work from paper to a dashboard. They never removed the work.

One WhatsApp chat runs it all.

You approve, ONVOIX does the rest.

STEP 1

Connect channels

Instagram, TikTok, LinkedIn, Facebook, Reddit linked once, in about a minute.

STEP 2

Just message it

Send a photo, a voice note or a one-liner. ONVOIX writes caption + hashtags and previews it per platform.

STEP 3

Reply YES

It publishes or schedules everywhere, then reports what's working — weekly, in the same chat.

Nothing publishes without your approval

Control is the product. ONVOIX drafts, you decide — the same trust model as a human social media manager, at software cost.

LIVE CHAT — HOW IT FEELS

B

☕ new latte art just dropped, post it to insta + tiktok

O

Draft ready — Reel caption + 12 hashtags, best time today 6:30pm. Preview set for Instagram & TikTok. Reply YES to publish, or tell me what to tweak.

yes go

O

✅ Published to both. I'll track saves & shares and fold the results into next week's plan.

Voice notes in, posts out. The chat is the interface — no app to learn, nothing new to open.

AI content engine **v2** — the full loop, end to end

Create → approve → publish → measure → improve. Every stage handled from the chat, with a full web studio when you want to go deeper.

Writes like you

Captions, hashtags and platform-native formatting learned from your past posts and voice. Voice notes become posts.

Plans your week

Post scheduler with per-platform previews and best-time scheduling. A consistent calendar without touching a calendar.

Publishes everywhere

Instagram, Facebook, LinkedIn, TikTok, Reddit — one approval fans out to every connected channel.

Measures honestly

Follower & engagement analytics run themselves. Weekly "next best moves" arrive in chat, not in a dashboard you'll never open.

Web studio included

Power users get a full studio on the web — bulk views, media library, deep settings — synced with the same assistant.

Multi-language, multi-niche

Works across languages and ships tuned playbooks for 9 niches — from restaurants and dentists to music and fashion.

Not just posting — actual growth, on autopilot

Three engines compound on top of the publishing loop. This is what turns a tool people like into a tool people can't cancel.

AUDIENCE DISCOVERY

Reaching the wrong people burns months

ONVOIX scans your niche — competitors, hashtags, locations, interests — and shortlists real accounts most likely to follow and engage.

@fitness.daily 94

@corewithmari 88

Ranked targets. You approve before anything happens.

TRENDS → CONTENT

By the time you spot a trend, it's over

It watches what's working across your niche and turns it into post ideas written in your voice — ready before the week starts.

THIS WEEK'S IDEA · TRENDING IN FITNESS

"3 hooks that stop the scroll" — Reel, 20s

PROOF, NOT VIBES

Growth work is daily — and you're busy

Follower and engagement tracking runs itself. Every week: the next best moves and every milestone, straight to your chat.

+9%

THIS WEEK · YOU SEE WHAT GREW, AND WHY

Everyone already lives in WhatsApp. So the assistant lives there too.

3B+

people already use WhatsApp

The world's most-used chat app is the interface. No new app to download, no dashboard to learn, no onboarding wall — the product rides rails 3 billion people already know.

0 min

learning curve

If you can text a friend, you can run ONVOIX. That's the adoption unlock every dashboard-era competitor can't retrofit without rebuilding their product.

voice-native input

Founders think out loud. Send a voice note from the kitchen, get a finished post back. Competitors built for keyboards; we're built for real life.

approval-native trust

Chat is the natural place for "here's the draft — yes or no?". Approval flows are awkward in dashboards; in WhatsApp they're how conversation already works.

The wedge: WhatsApp-first isn't a feature, it's a distribution strategy. Your product's touchpoint is the one app your user opens 20+ times a day — retention lives where attention already is.

A huge, growing market moving from dashboards to **agentic chat**

CREATOR ECONOMY SIZE

\$480B

projected by 2027, up from ~\$250B in 2023 (Goldman Sachs). 200M+ people worldwide create content today.

SOCIAL MEDIA MANAGEMENT SOFTWARE

\$25B+

public analyst estimates for the category by late-decade, growing ~20%+ a year. Every business with an Instagram is a prospect.

OUR BEACHHEAD

200M+

creators + SMBs who manage social themselves. Start with solo creators and local businesses — expand to agencies managing many brands.

Why now

1. LLMs made quality writing + strategy cheap. 2. WhatsApp Business APIs matured for programmatic two-way chat. 3. Platform APIs (IG, TikTok, LinkedIn) support approved publishing. Three curves just crossed.

Expansion path

Creators → local businesses → agencies → enterprise brand desks. Same engine, bigger wallets. Plus the on-platform business line (€29–35/mo) for client conversations, bookings and payments.

Market figures are public analyst estimates, cited on the sources slide. Beachhead sizing is an internal estimate.

9 NICHEs SHIPPED, PLAYBOOK-TUNED

Influencers

Fitness

Restaurants

Startups

+ fashion, photography, music, dentists, brands — each with tuned content playbooks.

Product velocity

AI content engine v2 shipped — richer voice-matched drafts, trend engine and weekly proof reports.

Engagement loops

Weekly growth reports land in the chat users already open daily — the report *is* the re-engagement channel.

Simple SaaS pricing, **expansion built in**

7-day free trial, cancel anytime. Annual billing saves 40%. Pricing shown mirrors the public launch offer.

GROWTH STARTER

\$13 / month

For creators getting consistent.

- ☑ Connect accounts & post in minutes
- ☑ AI post generator + scheduler
- ☑ Core follower & engagement analytics
- ☑ WhatsApp assistant

GROWTH PRO

MOST POPULAR

\$29 / month

For serious growth across every channel.

- ☑ Every channel connected
- ☑ Audience targeting + trend engine
- ☑ Deep growth analytics & strategy
- ☑ Smart growth notifications

Annual lever

SAVE 40% on yearly billing — better cash flow and lower churn from day one.

Expansion revenue

Agencies managing multiple brands · business line with voice €29–35/mo · payments & booking tracking on the roadmap.

Unit economics (assumed)

Low CAC — chat-native onboarding, no sales team. Blended gross margin ~85% on LLM + platform costs.

Dashboard-era tools optimize clicks.

We optimize conversation.

	ONVOIX	BUFFER / HOOTSUITE	LATER / ICONOSQUARE	AI CAPTION APPS
Interface	WhatsApp chat	Web dashboard	Web + mobile app	Standalone app
AI writes in your voice	☒ voice notes in	Partial (bolt-on)		Captions only
Publishes to 5 platforms			Partial	
Audience discovery & targeting			Partial	
Trend → post-idea engine	☒ weekly			
Approval-native flow	☒ reply YES	Workflow seats		n/a
Weekly proof in-chat		Email digests	Push alerts	

Defensibility

Voice model per account compounds with every approved post;
ONVOIX · Investor deck
niche playbooks and target lists deepen with usage; switching
means abandoning your trained assistant.

Risk & response

Platform API changes → multi-platform + WhatsApp-side
stickiness. Chat-app fees → priced into plans. Meta/Google
shipping assistants → weekly niche deep and approval first, not
